

# ARE YOU SUFFERING FROM RETINITIS PIGMENTOSA (RP)?

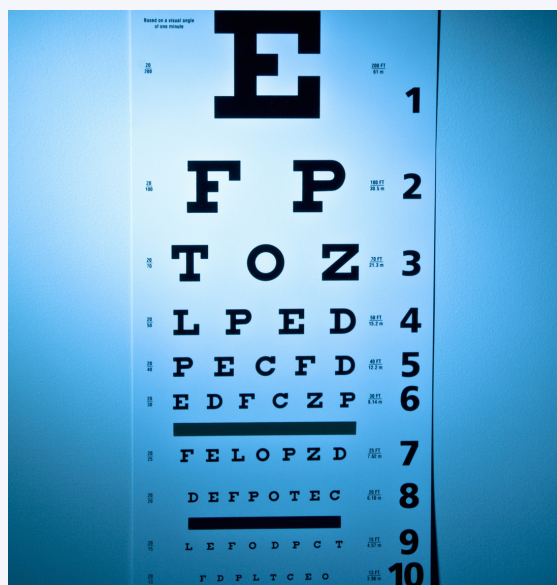

## YOU MAY BE ELIGIBLE TO TAKE PART IN A RESEARCH STUDY

RN03-CP-0001 is a research study which aims to determine whether administration of experimental Human Retinal Progenitor cells (hRPCs) by sub-retinal injection is safe and if it may improve visual function in subjects with RP.

## HOW DO I KNOW IF I AM ELIGIBLE?

- ✓ Have been clinically diagnosed as having RP.
- ✓ Have an ETDRS BCVA of 8 letters (approx. 20/800) to 68 letters (approx. 20/50).
- ✓ Are an adult over 18 years of age.
- ✓ Are willing and able to complete pre-surgical assessments and undergo a surgical procedure on your eye.
- ✓ Are willing and able to attend approximately 17 study visits over 2 years.
